DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or render obvious the claimed combination including: an electromagnetic fuel injector an internal combustion engine; the injector comprising a main body having a central cylindrical cavity, a valve which is disposed to close an end of the central cylindrical cavity and provided with a moving shutter and an electromagnetic actuator which is provided with a coil disposed coaxially about the central cylindrical cavity, a fixed armature of ferromagnetic material, and moving armature of ferromagnetic material mechanically connected the shutter, the injector further comprising a monolithic tubular member made from ferromagnetic material and houses the fixed armature and the moving armature of the electromagnetic actuator, and the fixed armature and the moving armature are made from first ferromagnetic material, while the tubular member made from a second ferromagnetic material having a lower magnetic permeability than the first ferromagnetic material

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to a fuel injector: Hamada et al., and Fochtman et al.
